

Multi-platform. Multi-layer. Multi-feature. Single Source.

Marshal8e6 Web and Email Security Fits Your Network and Your Budget.

There is a constantly growing and evolving list of Internet threats that will disrupt your business environment; impacting employee productivity, compromising the network and its performance, exposing organizations to legal liability and damaging corporate reputations. Stopping the risks posed by malicious code, viruses, spam, social networking sites, anonymous proxies, IM and P2P requires a powerful array of security tools — based on platform-of-choice — that secure all forms of Internet-based communication streams.

These tools should fit correctly into any organization and network. That's exactly why 8e6 Technologies and Marshal — two proven and trusted names in Web and email security — have merged to become Marshal8e6. Our industry leading solution is multi-platform, multi-featured, highly scalable and contains the flexibility required by today's businesses. Additionally, one support group services every product, top to bottom, providing a better operating experience and contributing to superior cost of ownership.

Web Monitoring, Filtering and Reporting

Professional Edition

High-performance, scalable, appliance-based URL filtering, application control, detailed forensic reporting and real-time monitoring and mitigation of Web-based threats. Interoperable and easy to deploy in any network infrastructure; utilizes "pass-by technology" for zero network impact and fail-safe operation.

WebMarshal

Software-based, comprehensive Web access control and management, threat protection (URL, AV and malware filtering) and data leakage prevention. Policy-based, easy-to-manage and highly scalable.

Email Security

MailMarshal SMTP

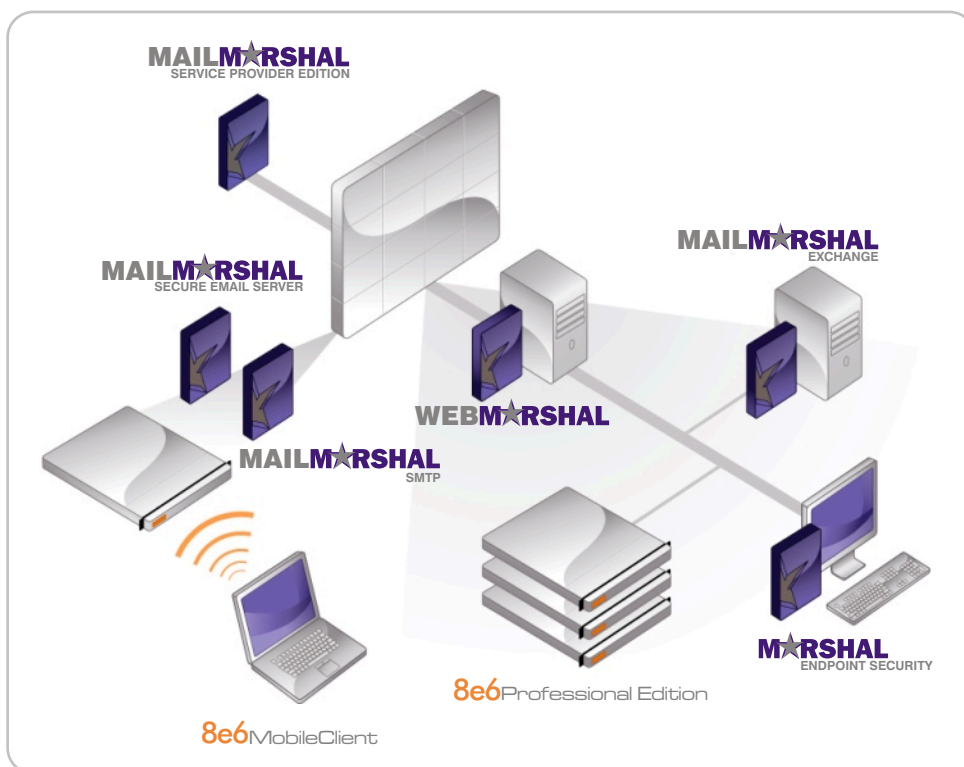

Software-based threat protection, unifying content security, policy enforcement, compliance and data leakage prevention. Acts as an email gateway — powered by a Defense-in-Depth anti-spam engine — filtering all incoming and outgoing email at the perimeter. Highly scalable, flexible and easy to manage.

MailMarshal for Exchange

Filters and manages internal, inbox-to-inbox email. Monitors and controls intra-organizational email content, facilitating a safe, productive working environment and compliance with acceptable use policies.

MailMarshal Secure Email Server

Dedicated, policy-based, secure email solution that provides encryption, digital signature and deep content inspection of inbound and outbound email messages. Operates with any email gateway that can recognize S/Mime encrypted email and automatically updates contact details and secure certificate credentials for encryption contact, via a centralized server.

MailMarshal Service Provider Edition

SaaS security solution enables Managed Service Providers and Internet Service Providers to offer hosted email content security services to any size business and SOHO customers. Combines email filtering, anti-spam, anti-virus, anti-pornography, anti-phishing, policy compliance, email archiving and reporting. Centrally-managed and highly-scalable.

Endpoint and Mobile Security

Marshal EndPoint Security

Policy-based enforcement solution only allows authorized removable media devices to connect to corporate desktops.

Monitors and controls removable media devices such as USB flash drives, iPods, PDAs and CDs.

8e6 Mobile Client

URL filtering software that works in conjunction with the Professional Edition to filter remote/off-site users. Works on PC and Mac notebook devices; delivers centralized reporting via the Professional Edition.
