

What's New in the R3000 '2.1.10' Version

This newest release of software for the R3000 Enterprise Filter requires an R3000 unit running software version 2.1.05 or later.

NOTE: 8e6 recommends applying this software update during periods of low network usage, as it will have a severe impact on the server resulting in a decreased filtering performance for approximately five minutes

WARNING: After applying this software update, please clear the Java cache. Refer to http://fxtrade.oanda.com/support/troubleshooting/clear_cache.shtml for instructions on clearing the cache, based on your browser type.

Enhancement

- **Wildcard Exception URLs now accepted** – The Exception URL window (available for any entity in the Group tree) now accepts Wildcard URL entries.
